PCT/US03/29117**V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. STATEMENT**

Novelty (N)	Claims <u>1-34</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-34</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-34</u>	YES
	Claims <u>NONE</u>	NO

**2. CITATIONS AND EXPLANATIONS**

Claims 1-34 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a method for operating a repeater comprising the inventive step of:

selecting a second frequency channel for use by the at least one of the one or more repeaters for retransmission of one or more additional signals received on the first frequency channel based on the characterizing of the signal; and/or setting a repeater to operate on a first frequency channel and a second frequency channel when a number of the one or more signals indicating a wireless transmission detected on a second frequency channel are at or below minimum value.

Claims 1-34 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
